

Synopsis: The Viking's Yuletide Woman

In 666 AD, the Vikings, led by Prince Ivar of Denmark, invade York. Captain Bronwolf's mission is to abduct King Aelle's daughter, Aethelthryth, and hold her hostage. But the princess has been whisked to safety; instead, he captures her look-alike maid, Ella. He is drawn to her even though she is forbidden fruit.

Ella quickly realizes in order to prevent herself from becoming a plaything for Viking warriors, she must pretend to be the princess. That plan backfires when the prince decides to make her his bride.

When Bronwolf discovers her true identity, he knows how furious the prince will be. He must get Ella out of harm's way, even if it costs him his command...and maybe his life.
